

1. RS485 bus connector

1.1 General information

The RS485 bus connector is used to connect a controller to a Profibus network or an RS485 network. The terminating resistor is integrated in the bus connector. The terminating resistor can be turned on or off.

1.2 Order data

Model number	Short description	Figure
0G1000.00-090	Bus connector, RS485, for Profibus networks
