Table 2: 8B0C0320HW00.002-1 - Technical data

1) Continuous power on the 24 VDC output
2) Valid under the following conditions: 750 VDC DC bus voltage, 55°C ambient temperature, installation elevation <500 m above sea level, no derating due to cooling type.
3) The output voltage is limited to max. 60 VDC in the event of error.
4) When switching off, there is no active discharge of the output and the loads connected to it.
5) Continuous operation at an installation elevation of 500 m to 4,000 m above sea level is possible taking the specified reduction of continuous power into account. Requirements that go beyond this must be arranged with B&R.
6) These dimensions refer to the actual device dimensions including the respective mounting plate. Make sure to leave additional space above and below the devices for mounting, connections and air circulation.

4 Status indicators

Status indicators are located on the black cover of each module.

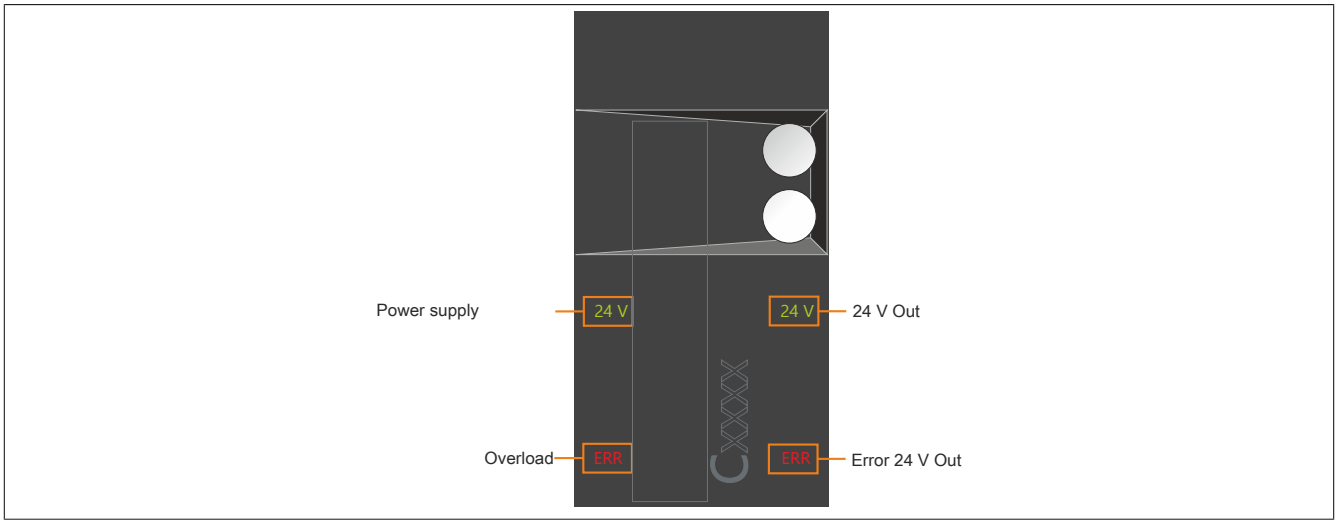

Figure 1: Auxiliary supply modules with 24 V Out (8B0C0xx0Hx00.00x-1) - Status indicator groups

4.1 Auxiliary supply modules with 24 V Out - LED status indicators

Status indicator group	Label	Color	Function	Description
Power supply	24 V	Green	24 V OK	The 24 VDC internal system power supply is within the permissible tolerance.
Overload	ERR	Red	Overload	The module is not supplied via the DC bus. [1] The 24 VDC internal system power supply is outside of the permissible tolerance (overload, overtemperature, short circuit, etc.).
24 V Out	24 V	Green	24 V Out OK	One of the switchable 24 VDC outputs is enabled; the output voltage is within the permissible tolerance. The 24 VDC internal system power supply is within the permissible tolerance.
	ERR	Red	24 V Out error	The 24 VDC internal system power supply is outside of the permissible tolerance (overload, overtemperature, short circuit, etc.). At least one of the switchable outputs is enabled, **and** one or more switchable outputs has tripped the electronic fuse.

Table 3: 8B0C auxiliary supply modules with 24 V Out - LED status indicators

1) The module is enabled via input CR_OK, no electrical contact to the backplane module - check the lower mounting screw.

5 Dimension diagram and installation dimensions

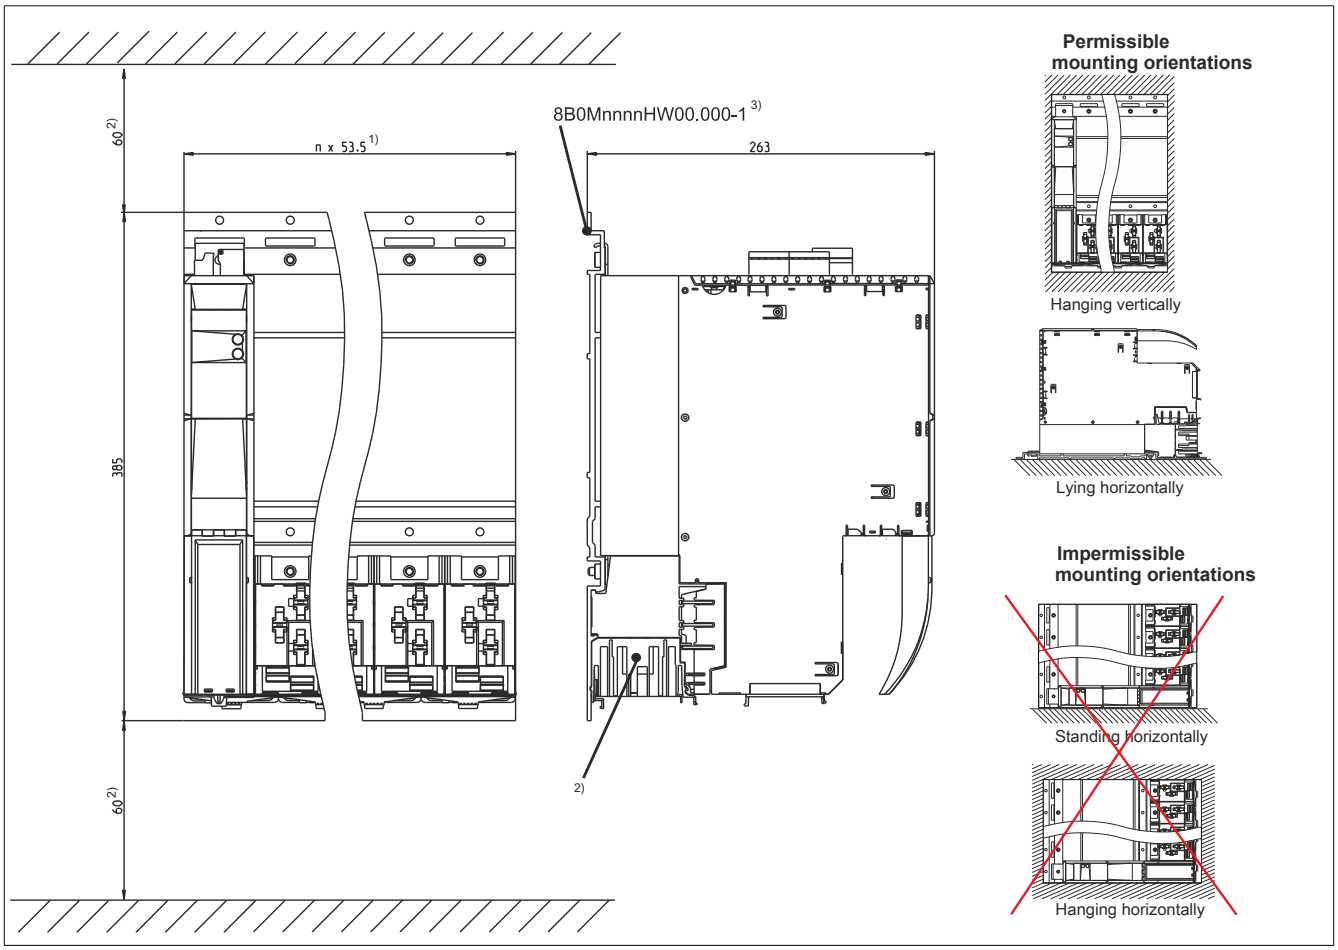

Figure 2: Dimension diagram and installation dimensions

1) n... Number of width units on the mounting plate
2) For sufficient air circulation, a clearance of at least 60 mm must be provided above the mounting plate and below the module.
To ensure that the fan modules in the mounting plate can be replaced easily, at least 250 mm clearance must be available below the module.
3) nnnn indicates the number of slots (e.g. 0160 refers to 16 slots).
