"With reliable products like the proven X20 system, and integrated industry-specific technology such as telecontrol protocols, B&R is the right partner for your sector of the energy industry."

Integrated automation
Global presence
Solid partnership
Full redundancy

The many different system expansions satisfy the high demands of power plant control.

Alarm files

Maintenance and monitoring activities can be recorded in detail.

Audit files

The many different audit files ensure the complete traceability of all events and actions.

User files

User files provide the user with all the necessary information.

Web XS

Web XS provides access to all the functions of the process control system.
